That only means an advance of 5 55-190 per cent, but Mr. Dolan will not have much of an opportunity to air his views before the convention. It is somewhat inspiring to think what will hapen to him when he arises to speak.

There is to be a reprisal for this fighting by the West Virginians. It will be perhaps the most severe that can be inflicted, and it is nothing more or less than the determination by the peace party to see that Mitchell and his organization unionizes the entire district as soon as possible.

ing debates.

Though much attention is being given to the presentation of the merits of the question pro and con, a still larger number of senators are devoting themselves even more assidiously to the preparation of amendments to the bill.

The Republican senators who do not secept the House bill are concentrating their efforts upon a review provision, and they have practically agreed upon the fifth section of Senator Knox's substitute for the pending bill as the basis

to the United States Circuit Courts, and requires the railroad companies to deposit the difference between their own rates and the raies fixed by the commission, pending the final adjudication of each particular case. Senator Spooner has an amendment along the same lines, but it goes into greater detail, and the indications are that much of his phraseology may be accepted.

The Democrats are working, in the mane, along the line to secure an amendment, which shall prohibit the lower courts from suspending rates fixed by the commission. Senator Tilliman is giving his especial attention to modifications which will prohibit the railroad companies from owning the commodities which they carry.

"Let ye dance go on."

"The flowers in May are ever welcome; so are you."

A good name is rather to be chosen than great riches, but fortunately for the problem of selection, "a good name" is usually good collateral.

Last Sunday night he took the ground that the Bible, though written by inspired writers, contained errors, in that inspired writers were not necessarily free from making mistakes; that the Book of Genesis and the stories of Job and Jonah were myths or allegories, designed to teach important facts, and that modern science had knocked many barnacles off the Bible.

May Abolish Boxing.

BALTIMORE, MD., March 18.—Several bills are before the Maryland Legislature whose purpose is to greatly restrict, if not to entirely abolish, boxing in the State.

Whatever may be the merits or demerits of the art of boxing, or of holding boxing exhibitions for profit, there are many clitterns of Baltimore of the class whose opinions are given great consideration who, while they probably do not care much one way or the other, would, on the whole, feel regret if boxing were stopped here. There are many hundreds—perhaps thousands—whose opinions are not of so much moment, who would consider it an outrage if they were permitted no longer to enjoy a favorite sport.
